

LTG Associates Inc.

About LTG

A woman- and minority-owned small business in its 35th year, LTG Associates is the oldest and largest anthropologically-based consulting firm in North America. LTG's work centers on research, assessment, design, monitoring, evaluation, and support services. With experience in all 50 states, all territories and freely associated states of the U.S., and over 50 countries, we specialize in the development and conduct of health and human services programs, the content of policy, and the shape of communication. From multi-year contracts to short-term consulting assignments, LTG works equally well with quantitative and qualitative methods and demonstrates creative flexibility while maintaining quality standards and meeting goals and deadlines. We bring a highly contextualized view of health and human service issues supporting sustainable approaches.

Services

- **Program assessment, design, monitoring, and evaluation,**
- **Training, capacity development, technical assistance, and support,**
- **Program and policy research, planning, and evaluation support,**
- **Program and policy focused meeting planning, convening, facilitation, rapporteur, and analysis and reporting,**

Clients & Projects

LTG works collaboratively with local, state, and federal government agencies, non-governmental and non-profit organizations, and for-profit firms domestically and internationally. A few examples of LTG's clients and work are provided below.

- **World Health Organization Preparing for Treatment Programme evaluation project** – LTG conducted monitoring and evaluation, providing capacity development to a global network of over 140 HIV/AIDS treatment related projects.
- **USAID Population Technical Assistance Project and the Monitoring, Evaluation and Design Support Project** – LTG provided short-term technical assistance in design, monitoring and evaluation of maternal, child health, child survival, nutrition, infectious disease, HIV/AIDS, family planning and reproductive health programs, with the goal of improving availability, quality, and use of key interventions. Nearly 400 projects were conducted globally in over 50 countries.
- **Office of Minority Health in the U.S. Department of Health and Human Services** – LTG provided evaluation capacity building and technical assistance to over 100 grantees.
- **First 5 Merced Commission** – LTG provided ongoing support including program and policy focused evaluation, grantee evaluation technical assistance, and data systems analysis. LTG worked with over 80 grantees focused on early childhood development.
- **Healthy People 2020 – Progress Review and Midcourse Review Workgroups for Mental Health and Substance Abuse at SAMHSA** – LTG provided technical support, including identifying and interpreting data sources.
- **Strengthening What Works (SWW) Preventing Intimate Partner Violence in Immigrant and Refugee communities** – LTG was the National Program Office for the Robert Wood Johnson Foundation's intimate partner violence prevention initiative. LTG managed this effort, conducted program evaluation, and provided capacity-building in evaluation to SWW grantees.

Expertise

LTG staff members are trained in anthropology, public health, public policy, psychology, medicine, social work, sociology, gerontology, education, and early childhood development. We are researchers, analysts, evaluators, educators, writers, cultural brokers, facilitators, management consultants, and trainers. Within our staff and our extensive cadre of consultants, we bring fluency or professional proficiency in 105 languages as well as broad and specific knowledge of many peoples and cultures.

The Difference

LTG Associates is an innovative, learning organization. We believe in the critical nature of partnerships and the inclusion of communities of interest and consumers of services from a project's inception.

Specialized Areas

LTG has worked with over 35 ethnic and minority populations in the United States, and with vulnerable, at-risk, and underserved populations, on many diverse subject areas including:

- **HIV/AIDS**
- **Maternal child health**
- **Early childhood development**
- **Outreach and barrier reduction**
- **Special populations**
- **Substance use/abuse**
- **Aging/geriatrics**
- **Population health**
- **Intimate partner violence prevention**
- **Immigration, migration, and refugee movements**
- **STDs/STIs**
- **Infectious diseases**
- **Chronic conditions**
- **Faith and interfaith issues**
